For fax or postal mail only states (no emailing allowed): AK, CA, FL, LA*

So, if you don't have access to a fax machine, here are some tips on ways to turn an email attachment (pdf file) into a fax:

1. There are various smartphone applications that will convert an email attachment to a fax. Print, fill in and scan in your ballot and any required materials as an email attachment, then search for "*fax app for Android/iPhone"* on application platforms like Apple's *App Store,* Google *Play Store*, *Galaxie Store*, etc. Follow the instructions to convert your email attachment into a fax transmission.

2. Or, you can use the Fax service through the Federal Voting Assistance Program (FVAP.gov). You will need to email your ballot and any required supporting materials to this address: fax@fvap.gov

You must use FVAP's fax coversheet: www.fvap.gov/uploads/FVAP/Forms/coversheet.pdf.

FVAP will then fax your election materials to your Local Election Official.

But ***don't wait until the last minute when using the FVAP fax service!*** The service can get overloaded and FVAP does not guarantee that your voted ballot will be faxed to your Local Election Official by the deadline.

*For Louisiana: note that there's an extra requirement that the voter must make prior arrangement with their Local Election Office
